

New Skills For Old

There are several reasons why unemployment remains stubbornly and uncomfortably high. But, without a doubt, a high proportion of those out of a job for any length of time stay jobless either because they are unskilled or because demand for their particular skill is not what it was.

At the same time, employers' newspaper advertisements and National Employment Service bulletins daily emphasize the fact that there are opportunities which are and have been for some considerable time—very much in demand. Clearly, what is needed is a much more ambitious, long-range program of job training and re-training than anything we have yet attempted in Canada.

Little Belgium, in the *Labour Gazette* recently pointed out, is one country which has shown what can be done. There are more than 25,000 unemployed persons over the past 15 years and over the same period has developed her own system of program to provide where it is today one of the most advanced in the free world.

Training centres are located in various parts of the country. These operate within a framework of a high level of training system that adapts the kinds of trades taught to the nation's economic needs and is a forecast by a manpower policy studies unit. Length of an average course is five to eight months, but in this is shortened where possible.

A Belgian who successfully completed his course is said to be semi-qualified, a few months of practical experience usually is enough to make him fully skilled. Although most trainees are in their 20's and 30's, the oldest are over 40.

The training program being quite separate from the regular vocational training program for school leavers.

There would seem to be no reason why Canada could not profit from Belgian experience. In fact, from that of other industrial countries that have gone further along these lines than we have.

It is indeed, from that of other industrial countries that have gone further along these lines than we have. It is certainly in position to know which industrial and commercial jobs are going to be needed in the years immediately ahead.

This being so, the Senate Committee on Manpower and Employment could well want to carefully consider the possibilities of instituting some such system in Canada. The *Labour Gazette* would seem to be prolonged illness—and maintenance out of unemployment insurance and public funds—of the unemployed, or otherwise be placed in productive work.

After spitting from current conditions, the skills of growing number of Canadians now employed are going to become redundant over the next five or six years. Are those who will be affected going to be able to find alternative employment? The answer to this question is likely to depend more than anything else on what steps they take in the interim to develop an alternative skill.—Inventory

Obituary

Charles Greer

We regret to have to record the death of one of the best known farmers of the Delta district, Charles Greer, who passed away in the Hanna Hospital on Thursday, July 7th, 1950, following a brief illness. He was 68 years of age.

Mr. Greer came to the Delta district in 1912 to take up farming, which he continued until his death.

Deceased leaves surviving his loving wife; one son, William, at home; one daughter, Mrs. L. M. Desjardins, of which latter he was the father. Mr. Greer, of Delta; also five grand-children.

Funeral services were held from Delta Union church on Saturday, July 9th, at 2 p.m., with the pastor Mr. L. N. Turner officiating.

Interment took place in No. 256, "Dear Lord and Father of Mankind," and 493, "I Need Thee Every Hour."

Funeral services were held by Mrs. A. Whitman and Mr. Andy Macdonald, "Somewhere the Sun is Shining."

Funerals were—Messrs. O. Tabor, E. Tilton, Bob Milne, M. Pennell, S. Herman, and H. Stevenson.

Funerals were held by Messrs. C. McCully, J. Kary, B. Sinclair, R. Gibson, S. Coffin, and M. Williams.

Celebrate Golden Wedding Anniversary

Mr. and Mrs. E. Tilton Honored

Mr. and Mrs. E. Tilton, residents of Lacombe for the past 25 years, and pioneers of the Craigmyle district, were honored on Sunday, July 9th, on the occasion of their golden wedding anniversary.

Mr. Tilton, 72 years of age, and Mrs. Tilton, at 67, both enjoy good health, and are active in the community.

The celebration was held at the banquet room of the Lacombe memorial centre where over 100 friends and relatives were entertained at a delicious banquet. Catering was Fred Mah, an old friend of the family.

Mr. and Mrs. Tilton made a charming couple, seated at the head table with their children and grandchildren. A three-tiered wedding cake centered the table.

In charge of the guest book were Miss Shirley Patrick, a three-tiered wedding cake centered the table.

A FRANK STATEMENT

An official statement by the International 'Wheat' Council, meeting in London, England, recently, drew sharp attention to certain facts about world wheat surplus and government intervention in grain affairs, most of which have long been recognized in grain trade circles. One was struck, however, by the frankness of the statement which read in part:

"Widespread governmental intervention in grain affairs by both exporting and importing countries under the compulsion of their national policies has substantially modified the opportunities for normal trade."

The statement went on to say that the result has been regulation of international trade on a large scale in a manner which constitutes "with the principle of international specialization on the basis of comparative advantage."

Particular mention was made of governments who had followed a policy of protecting domestic agriculture. Such policies, the Council observed, had come about with technological advance and had resulted in a stock pile large enough to meet world requirements for about two years.

Apart from the concerns expressed by the Council about such policies, however, its general observations about the solicited demand for wheat and the future stock position were very reassuring. While world wheat trade, it asserted, will remain about the same in 1950-51, with Canada probably selling slightly less than in the previous season, carver stock are expected to rise to almost 20 million bushels in 1950. The continuing high level of wheat trade, moreover, cannot be considered normal because it has been due "in no small part to the government assistance programs which accounted for 20% of the world trade in 1950-51."

Mr. and Mrs. Tilton have sons—Reg of the Northwest Territories, Ed of Hanna, B.C., and Youell of Calgary; and two daughters, Mrs. Harry (Mrs. Tilton) of Lacombe, and Mrs. Don (Mrs. Tilton) of Penitence, B.C. There are 11 grandchildren.

Stockwatering Dams

Construction of three stockwatering dams on the Morris River in Manitoba, all within 11 miles of the town of Morris, has been approved, Agriculture Minister Douglas S. Harkness announced today.

The contract has been awarded to H. Harris Construction Co. Ltd. of Winnipeg, whose \$70,833 tender was the lowest of five submitted.

About 150 families living within 2,000 feet of the river along the 11-mile stretch will be directly affected.

Well water throughout the north has always been notoriously scarce.

Since early times attempts have been made to store water in the river for constructing small canals for the benefit of the river.

QUICK CANADIAN QUIZ

- When were Canada's parliament buildings constructed?
- In 1950 was the total of immigrants to Canada 107,000 or 322,000?
- What is the age and location of Canada's oldest church building?
- Which had the greater value in 1950, Canadian goods sold abroad or foreign goods sold in Canada?
- Do more of Canada's 4,300,000 families own their own homes or live in rented dwellings?

ANSWERS: 1. Home-owning families, number 2,313,000, 1,390,000 families rent. 2. New part of the Quebec General House was built in 1970 by a member of the Parliament order. 3. In 1859 16 architects entered a design competition for the parliament buildings and construction was completed in 1866. 4. In 1950 imports total was \$5,000 million, exports \$5,180 million. 5. In 1950 the postwar high of 28,000 was the postwar high.

Crunchy topping

To make a delicious, crunchy topping for ice cream or an instant pudding, put out bread into a meat-chopper, chop until you have one cup. Toast the cubes from both sides in a skillet and add the cubes and one-third cup of dark brown sugar. Heat the mixture until it browns then remove the skillet from the stove, add one-quarter cup of chopped nuts and a dash of cinnamon and cool. Sprinkle over pudding or ice cream just before serving.

The next time you make baking powder biscuits, brush the tops with milk or cream before putting them in the oven and they will have a rich, brown crust.

Economists tell us one reason western civilizations have dominated history is 1341: their economy is based on bread and wheat—one of the most economical and stable sources of energy known to man.

Garden benches

An unusual design for a bench to be placed at some four foot path will lead direction to your yard. Pattern 442, which gives lots of material, illustrated directions and

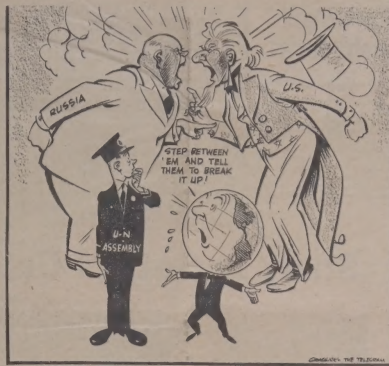

GARDEN BENCHES

Pattern 442

Actual-size cutting guides for three different sturdy types made of stock sizes of lumber, in the size of one of four full-size plans in the "Yard Planting" book. No. 73-41 for \$1.75.

Send twenty-five cents (coins) for this pattern (stamps cannot be accepted). Print plainly name, address, city, number. Send order to:

ANOTHER TOUGH JOB FOR THE ROOKIE COP?

Soldier-tars!

Army drivers acted as soldiers as they took part in a two-week course on the operation of amphibious vehicles on the Red and Assiniboine Rivers. The training was being taken in the event the vehicles are required in a national emergency or for rescue work in flood areas.

Three two-and-a-half-ton amphibious trucks known as "DUKWs", entered the Red River at the Redstone Boating Club and made their way along the river to the Legislative Building and returned. The DUKWs, cargo and personnel-carrying, featured prominently in rescue work during the Winnipeg flood of 1950 and were used extensively for launching operations during the war.

Ten drivers of No. 4 and No. 10 Transport Companies, Royal Canadian Army Service Corps have already spent a total of 24 hours on roads in the Greater Winnipeg and Portage la Prairie areas to familiarize themselves with routes to regions in which floods could possibly occur. The course had included instruction in maintenance and use of the vehicle in operation exercises.

The vehicle is capable of traveling up to 50 MPH on roads and with a speed of six to eight MPH on water. Supervising the training was Lt. Walter Korym, Motor Transport Officer, No. 10 Company, RCASC. Among the instructors are Sgt. E. Giese of Winnipeg and Sgt. John Searns of Regina.

CURTAIN-TIME: Cooper Hirsch tells a shirt tale in Armé and cotton checked breadcloth with simulated shawl embroidery. The shirtings gown ensembles all the way, washable with little boiling, stays crisp and cool.

PAINTING A ROOM seems a tall order for this young man, but he's springing time for a color change. Along this season's top 20 trend colors like turquoise blue, blue being the most popular.

ROALD AMUNDSEN Road Amundsen, first explorer to clear the Northwest Passage in 1906, was lost in the Arctic in 1925 when he flew north to rescue Italian explorer Umberto Nobile.

Highest average hourly wage in Canada are in the petroleum products industry, \$24.7 an hour, and primary iron and steel, \$24.0 an hour.

GOLF BALL In the early 1800's, when the livelier wood-and-rubber golf ball was introduced, mint golf courses had to be enlarged to keep the new ball in bounds.

FOUR SHOW Of all the children who enter Grade One of Canada's public schools, only 50 percent go on to high school and only 10 percent get through to the 20th year of high school.

Extension worker from India visits in Sask.

An agricultural extension worker from India, V. Balagopal, 30, is in Saskatchewan for two weeks gathering the way information on farm and home improvement is delivered to farmers in the province.

Sponsored by the Columbia Prince Rupert in studying extension activities across Canada in an attempt to find ways to improve the community development work of extension officers. He will be most impressed by the Centre for Community Studies at the University of Saskatchewan in Saskatoon, said that in no other place in Canada had he found a centre devoted to studying problems as a guide to extension work.

Mr. Balagopal said community development was an India-wide effort aimed at developing local agriculture, co-operation, cottage industry, public health and village construction activities and school and road-building. He said educational activities included adult education whereby illiterate persons were made aware of how to make use of modern amenities provided by the Indian government. Another aspect, social education, was to show rural people how they could best improve their living conditions themselves.

The Indian extension officer emphasized that the initiative for activities came from local people after meetings with extension workers, at which problems were discussed. He said an extension "block" consisted of 100 villages or 6,000 persons. The "multi-purpose village level workers" who were high school graduates with special training in agriculture and extension served the people in the block. They operated by finding out the problems of local people and trying to help solve them. Where special knowledge was needed, they contacted the subject specialists serving their block.

The extension work accomplished in India through the use of demonstration farms, agricultural fairs and group discussions among villagers and extension workers. Voluntary local leaders also were being developed.

U.S. BAND TO TOUR ALTA.

The Canadiana College Band from Moorhead, Minnesota will tour Alberta during the first week of June. Band Director, Professor L. L. Christensen, will be in Alberta again during August when he becomes chief instructor at the Second Annual Provincial Band Clinic held Aug. 6-13 in Edmonton. He is a local representative in northern Saskatchewan. He was born in the Kana, Sask. district and attended public school there and received his high school education in Yorkton. He graduated with a B.S.A. degree from the U. of A. in 1947.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

THE MOTORIST

"The motorist," warns the Canadian Highway Safety Council, "is responsible for keeping his car in top condition." At least eight out of every 100 accidents can be directly caused by motorist error. The Council urges all motorists to always be certain their cars or trucks are in safe operating condition.

To stress this particularly in the spring when vehicles are emerging from a co-shedding winter, the Council sponsors a "Check Your Car, Check Accident" campaign from coast to coast in Canada. The drive will continue through May with active participation by provincial and community safety groups and industries. Police will assist in many areas. It was stressed that drivers or of CHSC, points out that motorists will be on a 10-point check-up: brakes, front and rear lights, steering, tires, exhaust system, glass, windshield wipers, rear-view mirrors and horns.

The campaign coincides with similar drive in the United States and receives wide and valuable co-operation from all public information media.

SUNSHINE IN PACKAGE

A daily dose of vitamin D in liquid tablet or capsule form, should be given to every child from birth through all his growing years, to help in development of strong teeth and bones and to prevent rickets. Vitamin D should also be taken daily by the mother-to-be.

About 63 percent of Iceland's area is unproductive.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

It's an infallible rule, when a fellow gets too big for his job, the job is too big for him.

FURLONG

The furlong, or 220 yards, originally meant the distance a plow was operated without stopping to rest.

TOP SCHOLAR

Toy trucks

A whole lot of toy trucks of different types, and a warehouse where they are stored, are shown in the picture above. The trucks are made of metal and are very durable. They are also very cheap and are a great source of fun for children.

These trucks are made of metal and are very durable. They are also very cheap and are a great source of fun for children.

Seeks U.S. Wheat

Bakers in New Zealand are reported to have asked the government of that country to buy at least 10 percent of the country's hard wheat from the United States. The bakers have been unhappy with the quality of domestic wheat and high yielding but low protein home-grown wheat. We wonder who they have suggested U.S. or Canadian wheat.

that person had no source of income."

It is a pity that the same tale for unemployment benefits has been discarded and that taxpayers are now being called upon to support many people "statistically unemployed" but under no hardship and oftentimes affluent instead of being taxed only to provide for the needy jobless.

ELECTION CAMPAIGN

In Quebec an outstanding example of the forthright giving-and-taking of money for public interest and it assures that the public will not abdicate its right and duty to vote. The campaign is being led by leaders of both parties, with old-fashioned public meetings enjoying wide popularity, shows that the party system and all it stands for in terms of democratic freedom is not dead in Quebec.

One may wonder what the late hapless man in this country if plans developed by the American Broadcasting Company in the U.S. were to be carried out here.

Plans to develop, it is reported, to be set up "an isolated 'VIP room' at the national party convention this summer. Room will be equipped with foot vibrators, vibrator chairs, soft music and a donation box for each speaker. Room will be equipped with foot vibrators, vibrator chairs, soft music and a donation box for each speaker. Room will be equipped with foot vibrators, vibrator chairs, soft music and a donation box for each speaker.

Cleaning the Laying House

Dr. C. H. Bigland says that poultry producers could eliminate many of their health care problems by a practice of cleaning and disinfecting their laying houses annually. Too many people wait until a number of disease cases before adopting this measure.

Dr. Bigland is the pathologist for the Poultry Disease Laboratory of the Veterinary Services Branch of the Alberta Department of Agriculture.

In response to requests for information about the most satisfactory way of cleaning a chicken house, Dr. Bigland has outlined the following procedure: First, remove the birds, troughs, nest boxes, perches and any other detachable equipment. Then with a hose and a stiff scrubber thoroughly clean the floor and dropping boards and sweep off walls and ceiling. If the walls are made of concrete, remove the top three inches of earth and replace them with three inches of gravel. To remove the dirt from the walls, use a stiff scrubber and water. Walls and perches and nest boxes must also be thoroughly scrubbed with a stiff brush. The remainder of the walls and the ceiling with a solution of 2 per cent creolin (hot).

Finally, when the house is dry, give the interior and all contents including feed and water troughs, perches and nest boxes must also be thoroughly scrubbed with a stiff brush. The remainder of the walls and the ceiling with a solution of 2 per cent creolin (hot).

Finally, when the house is dry, give the interior and all contents including feed and water troughs, perches and nest boxes must also be thoroughly scrubbed with a stiff brush. The remainder of the walls and the ceiling with a solution of 2 per cent creolin (hot).

Finally, when the house is dry, give the interior and all contents including feed and water troughs, perches and nest boxes must also be thoroughly scrubbed with a stiff brush. The remainder of the walls and the ceiling with a solution of 2 per cent creolin (hot).

Finally, when the house is dry, give the interior and all contents including feed and water troughs, perches and nest boxes must also be thoroughly scrubbed with a stiff brush. The remainder of the walls and the ceiling with a solution of 2 per cent creolin (hot).

Finally, when the house is dry, give the interior and all contents including feed and water troughs, perches and nest boxes must also be thoroughly scrubbed with a stiff brush. The remainder of the walls and the ceiling with a solution of 2 per cent creolin (hot).

Finally, when the house is dry, give the interior and all contents including feed and water troughs, perches and nest boxes must also be thoroughly scrubbed with a stiff brush. The remainder of the walls and the ceiling with a solution of 2 per cent creolin (hot).

Women Urged To Promote Safe-Driving This Summer

OTTAWA—Wires should be allowed to spend more time behind the wheel, especially during the busy vacation period, according to Mrs. G. D. Finlayson, president of the National Council of Women of Canada.

"Because they are naturally cautious, women motorists are 'far less accident-prone' than men," she explained. "Statistics show that out of 150,000 motor vehicle accidents, only 10,000 were caused by women drivers in Ontario in 1959, only 11,500 were women."

Women who do not drive but are passengers in cars can help keep the traffic down by acting as "safety engineers."

Mrs. Finlayson urged that women who do not drive but are passengers in cars can help keep the traffic down by acting as "safety engineers."
